

Seasonal Adjustment Center of Excellence

Workshop on Time Series Methods for Official Statistics

CALL FOR PAPERS

September 26-27, 2019 – OECD, Paris, France

The Seasonal Adjustment Center of Excellence (SACE) in collaboration with the OECD is organizing a workshop on the use of time series methods for official statistics.

This workshop offers an opportunity for official statisticians, academics and researchers in economics and statistics to discuss policy applications emerging from new state-of-the-art analytical tools and techniques.

Themes include (but is not limited to):

- Seasonal adjustment,
- Benchmarking and temporal disaggregation,
- Nowcasting,
- Analysis of high frequency data,
- Revision analysis,
- Quality of seasonal adjustment,
- Case studies around the RJDemetra package and JDemetra+ plugins,
- Experiences in Statistical offices, central banks and other institutions.

Please send your abstract of no more than 250 words to roberto.astolfi@oecd.org and dominique.ladiray@insee.fr before **June 10th 2019**.

Abstract acceptance will be notified by the end of June 2019.

For further information, please contact the SACE co-coordinator, Dominique Ladiray (dominique.ladiray@insee.fr).

Key deadlines:

Deadline for abstract submission	June 10th, 2019
Notification of abstract acceptance	June 30th, 2019
Opening registration	July 15th, 2019
End of registration	September 6th, 2019
Deadline for paper submission	September 6th, 2019
Workshop	September 26-27, 2019
